### **Increased Extraction Capacity at SC Facility**

GREEN POND, South Carolina – Monday, March 15, 2004 --Triarco Industries, Inc. announced that by the end of March 2004 they would have increased their extraction capacity by 30% at their 56-acre facility.

“At a time when most companies continue to tighten their belts, I’m excited to be part of a company that continues to have enough capital and vision to invest in its future,” says Angelo Appierto, Chief Financial Officer. “What’s even more exciting is that we already own enough equipment to expand another 50 percent with very minimal cash outlay.” Appierto went on to say “the combination of excellent capacity and low overhead makes Triarco among the most cost effective extraction facilities in the country.”

The facility that was purchased for cash in 1998 was recently certified Kosher.
